

## **Behavior Change Communication Project (BCC)**

**Project Name: Behavior Change Communication Project (BCCP)**

**Project Duration:** June 2021 -June 2022 (1 year)

**Project Budget: USD 2,611.11**

**Project location / District and Community:** Kyaka II refugee settlement,  
Kyegegwa District, Uganda, East Africa

### **PROJECT DESCRIPTION:**

LHI will make Home to Home sensitization and Campaigns to deliver messages relating to: Family Planning, HIV/AIDS, Gender Based Violence (BCC), Drug abuse, Child's Education and Hygiene.

At least 100 families will be visited in a one week Home to home sensitization done once within 3 months' period; and at least 500 people in an open campaign also done once within 3 months' period.

### **PROBLEM STATEMENT:**

**a. The problem to be addressed:** Lack of needed Information

Refugees face many challenges in the refugee camps, which include poverty, hunger, lack of jobs, lack of shelter, failing to educate children and many more.

Having many children, in that unsafe and hard life condition, keeps fueling those problems. The children who don't attend schools turn in crimes, early marriage and prostitution and all those problems are harmful to the society.

Regardless of those most miserable and pitiful lives found in refugee camps, refugees count the highest rate of population growth because of different reasons: Religious, social etc and many lack information about F.P

LHI took the initiative through its program of Behavior Change, of sensitizing to people about Family Planning (F.P) in order to fight against those problems. After sensitization, a person committed to do family planning is referred to the qualified Hospital for further advice and assistance.

Also HIV /AIDS and Other Sexual Transmitted Diseases, Drug Abuse, Hygiene, Gender Based Violence (BCC), and mentality about child's education are very

big problems in refugee camp. LHI Will make effort to inform people, in order to improve life style of people.

**b. How our project address the problem**

One Week Home to Home sensitization once within 3 months' period; and one open campaign also done once within 3 months' period.

<b>Aim /Goal (lasting change)</b>	Behavior change of vulnerable people for better life.
<b>Outcome/objective (Changes that you want to see)</b>	To see informed people who also inform others, hence a better life's style improvement.
<b>Activities</b>	Sensitizing, informing and referring (where needed) to Hospitals or other institutions/organizations in charge for further advice and assistance.
